About Our Project

- A platform where researchers/institutions can easily crowdsource for:
 - Funding
 - Opinion(s)
 - Volunteer(s)
- Researchers/institutions can customize their case(s) as they see it fit
- Examples:
 - A biopharmaceutical company seeks to quickly and effectively search for volunteers to test a COVID-19 vaccine.
 - A group of researchers trying to fundraise a research that may cure cancer.
 - A group of psychologists are trying to test their hypotheses by asking people

About Our Project

- Our goals:
 - Minimize the gap between researchers/institutions and potential contributors
 - Minimize the time and money needed to conduct the research (especially looking for 'samples')
 - Allow users to easily contribute to the research
 - Increase society's awareness about scientific and technological progress
 - Facilitate researchers/institutions to boost their research
- Tech stack:
 - Frontend: HTML + CSS + Bootstrap
 - Backend: NodeJs
 - Database: MongoDB
